With features of 50W high power for long-range communication, power-on password, Bluetooth, access to BeFone conventional DMR systems to enjoy call capacity and clear voice communications, etc., the radio enables your workers to connect without distraction, whether they're delivering cargo, dispatching trucks or transporting passengers.

HIGHLIGHTS AND BENEFITS

Transmit Interrupt

This function enables a supervisor to interrupt a radio conversation in order to clear a channel for more important communications.

Radio Priority-Based Interruption

This function enables a radio with a higher level to interrupt communication between radios with lower levels, giving higher priority to radios with higher levels. This means better dispatching efficiency.

GPS(Optional)

When activated, the integrated GPS will enable BF-TM8500 to constantly send its location information to the command center for the commander to see in real-time. All your vehicles stay tractable and accounted for.

RemoteKill/Revive

Such functions greatly facilitate dispatching work and can be especially useful if you want to kill a lost radio.

Adjustable power

Our flexible BF-TM8500 comes with 3 adjustable power levels. The user can use 50W high power to further extend talk range or switch to lower power levels to extend radio standby time, according to his specific needs.

AutomaticRoaming

In an IP multi-site network, BF-TM8500 can automatically roam from site to site and stay connected, delivering seamless communications.
